Tom Hannigan  
Water Resources Director  
1416 Ninth Street  
Sacramento, CA 95814

Dear Mr. Hannigan,

This letter is in regards to the future of California's water resources. I currently live outside of California, but I plan to return to the state next year. I feel that all over the nation, water quantity is a huge issue. However, the answer is not in building new dams or reservoirs. There is an obvious need for working within nature's natural system or else we are repaid with silted, unclean drinking water. Please consider investing in water efficiency technology and education. I believe taxpayers are willing to spend money on new conservative ideas rather than ecologically devastative projects. Research alternative wastewater treatment systems that reuse water. Educate the public about native plant landscaping. There are so many solutions that are friendlier than building a dam.

Sincerely,

Jennifer Janis
